

Countdown to better VoIP installations with the new VoIP Enterprise Service Kit and get a great deal too!

3 Important steps to deploying VoIP:

1. Check your existing cabling with the CableIQ Qualification tester to be sure it will support Voice Over IP requirements
2. Do a VoIP Performance Check using the NetTool Series II inline tester
3. Quickly troubleshoot if issues arise once you're up and running with the NetTool Series II inline tester

CIQ-VOIP	CableIQ VoIP Enterprise Service Kit

- 3 Simple steps to VoIP deployment and support with...
- 2 Great Fluke Networks Products at...
- 1 Special introductory price of MSRP \$3995 USD

Got VoIP? Getting VoIP? Now get a great deal on the tools you need to quickly deploy VoIP on your network. Buy the new CableIQ™ VoIP Enterprise Service Kit and get a discount on two Fluke Networks products: NetTool™ Series II inline tester with VoIP Testing Option and the CableIQ Advanced IT Kit. That's a 15% discount when purchasing these two products separately. This special introductory pricing is for a limited time only. Buy your CableIQ VoIP Enterprise Service Kit before June 30, 2009.

2 Great Fluke Networks Products:

NetTool Series II Inline tester with VoIP Testing: Put the power of inline testing in the palm of your hand, giving you the ability to monitor VoIP service at the edge. You can now see into VoIP calls by connecting between the IP phone and network and solve many problems without the need of a protocol analyzer. Diagnose phone boot-up problems, call control and measure key call quality metrics.

CableIQ Advanced IT Kit: Your cabling was certified when installed, but have there been any moves, adds and changes since then? If so, they may have rendered many links incapable of running the speeds you need. Prevent countless hours of downtime and hours wasted on unnecessary troubleshooting. The CableIQ tester quickly reveals whether a link, including patch cords, is qualified for VoIP or voice, 10/100BASE-T, and Gig. With the CableIQ tester, you'll know your cabling's bandwidth capabilities before you upgrade. Included in the Advanced IT Kit is a remote adapter, the Intelitone™ 200 Probe and six remote office identifiers. You have everything you need to expedite problem resolution and facilitate moves, adds, changes and upgrades.

1 Affordable price for a limited time:

If you looking to deploy VoIP on your network, make sure your network is ready for VoIP. Buy the new CableIQ VoIP Enterprise Service Kit between March 16, 2009 and June 30, 2009 and take advantage of this special introductory price to get a NetTool Series II tester with VoIP Testing option enabled and the CableIQ Advanced IT kit at a substantial discount than if you bought them separately.
