Subject: Aeroflex Announces New Land Mobile Radio Test Systems Brochure

Aeroflex has redesigned our Radio Test Set Brochure, which is now called Land Mobile Radio Test Systems. This redesign includes our new 3920 Digital and Analog Radio Test Set and our portable 3500 Hand-held Radio Test Set. It also includes product information about our spectrum analyzers, counter power meters and new software applications. All US Area Sales Managers and Manufacturer representatives have been shipped some small amounts. If they need more or our Sales personnel and Distributors in Europe and APAC need copies, please utilize the literature request form on the Test Partners Login Site: <http://legacy.aeroflex.com/service/secure/secure.cfm>. The brochure is also available on-line: <http://www.aeroflex.com/ats/products/prodfiles/brochures/PMRBrochureIss4.pdf>.

Thank you for your continued efforts in selling Aeroflex equipment!
