Holmium Laser Enucleation of the Prostate (HoLEP) is a safe and effective BPH treatment option for prostates of all sizes. HoLEP involves enucleation of the median lobe, followed by the lateral lobes. The lobes are placed into the bladder for removal by morcellation.

**HoLEP results are comparable to TURP and Open Prostatectomy**

<table>

</tbody>
</table>

| Similar AUA symptom scores and Qmax |
| • Shorter catheter duration |
| • Shorter hospital stay |
| • No blood transfusions required |
| • Equivalent durability |

**HoLEP is durable at 6 years**

QOL, Qmax ml/s and IPSS outcomes at 6 years are comparable to outcomes at 1 year.

![Graph showing QOL, Qmax ml/s, and IPSS outcomes over time.](image)

**HoLEP has fewer complications and lower re-operation rate**

![Graph showing stricture and re-operation rates.](image)

**HoLEP and HoLAP are backed by strong clinical evidence**

HoLAP/HoLEP are the most studied laser BPH treatments with the highest number of published randomized controlled trials.

VersaPulse® PowerSuite™
• Highest power holmium laser (100 watts) provides smooth cutting, faster, more efficient tissue effect and reduced time
• State-of-the-art user interface that offers over 200 laser settings accessible through a color touch screen
• CaseSaver™ feature enables the surgeon to continue a case at reduced power in the event of a mechanical or optical malfunction

VersaCut™ Morcellator System
• Adjustable morcellation and aspiration rates provide maximum flexibility
• Compact size fits all operating room environments
• Handpiece ergonomically designed for either right or left hand use

SlimLine EZ™ Single-Use Fibers
• Available in 200, 365 and 550 micron sizes
• Ensure the best performance of fiber for every case

SlimLine™ Reusable Fibers
• Available in 200, 365, 550 and 1000 micron sizes
• Blue jacket enhances visibility during endoscopic surgery

Preceptor training package available with purchase of VersaCut Morcellator

Holmium Laser Enucleation of the Prostate

2 Holmium Laser Enucleation of the Prostate Versus Open Prostatectomy for Prostates Greater Than 100 Grams: 5-Year Follow-up Results of a Randomized Clinical Trial, Kantz RW, Lehrich K, Ahvai S. Eur Urol 2008 Apr;53:160-168
