

Specifications

Company Name

Lumenis, Inc.

Model Name

VersaPulse PowerSuite 80/100W

Part Number

0638-800-01

VersaPulse PowerSuite Dual Wavelength laser. Ideal platform for greater coagulation capability for tumors.

Synopsis

Technical Specifications

Wavelength

2.1 microns (holmium); 1.06 microns (Nd:YAG)

Weight

390 pounds

Dimensions

18"W x 36"Dx39"H

Power requirements

230V, 50/60Hz, 30 amps, single phase

Fiber Compatibility

SlimLine and SlimLine EZ fibers (200 to 1000 micron fibers); Sharplan 200 micron fiber; DuoTome fiber

Delivery System Compatibility

VersaLink reusable arthroscopy delivery system; InfraTome single use arthroscopy delivery system

Cooling system

Self contained water to air exchanger

Safety approvals

TUV, BSI, CSA, ETL

FDA clearances

BPH treatment, Urology including lithotripsy, arthroscopy, percutaneous diskectomy, general surgery, gynecology, ENT

BME training

Optional one week (40 hour) training program

Clinical Training

ANA accredited staff training

Service

Global on site service provided by direct Lumenis employees or authorized distributors

International Manufacturing Standards

ISO 9001
