

Just think ...

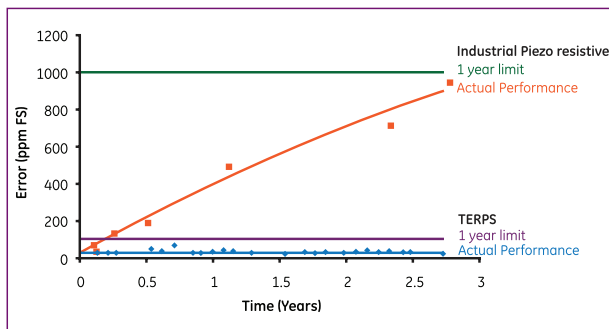

TERPS – 10 times more accurate and stable than standard silicon pressure sensors.

TERPS technology will optimise fuel consumption, fine tune turbine performance, measure atmospheric pressure, enhance safety.

The opportunities are enormous when you think about it.

+/- 0.01% accuracy and stability

Typical Stability Comparison

- Oil & Gas
- Marine
- Turbine generators
- Aerospace
- ROV, AUV
- Meteorology
- Tsunami monitoring
- Tidal level monitoring

... and many other applications

Data talks

View TERPS sensors test data on our website and see for yourself the incredible accuracy and stability that TERPS technology delivers.
