

# Server Maintenance and Support

## CompTIA Server+® Certification

Company servers keep an organization connected. Servers allow users to share files, programs and printers, and also store important information. As computer networks continue to become a vital part of business, it is essential to employ qualified technicians who can keep your servers up-and-running.

CompTIA Server+ validates knowledge of server issues and technology, including disaster recovery. It is a vendor-neutral certification that covers platforms such as RAID, SCSI and multiple CPUs.

Earning CompTIA Server+ measures knowledge of server hardware, including the ability to install, configure, upgrade, maintain and troubleshoot server technologies. Staffing certified technicians who know how to support and maintain server technology is an integral part of efficient business operations.

### Candidates for CompTIA Server+:

- Network Administrator
- Network Engineer
- Systems Engineer
- Security Analyst
- Web Site Administrator

## CompTIA Certification Programs

CompTIA is the world's largest provider of vendor-neutral certifications. CompTIA certifications are developed with the support of leading technology companies and organizations, and validated by field experts from around the world.

*"Earning CompTIA Server+ prepared me to work in a higher-level business and technical environment. Now that I'm certified, I work on systems valued in the thousands on a regular, if not daily, basis. CompTIA Server+ helped build confidence in my experience, and I feel comfortable working on these systems under pressure."*

- Eli Hernandez,  
IT Help Desk Support Specialist,  
For Eyes Optical

*"Not only did CompTIA Server+ give me a solid, foundational knowledge of the different types of server hardware, but also in the best practices and procedures for setting up and maintaining the technology."*

- Heather Keever, IT Director,  
Wheaton Sport Center & HealthTrack  
Sports Wellness

## Server Maintenance and Support

### **CompTIA Server+ gives your business a competitive edge.**

There are more than 15,000 U.S. businesses that specialize in the maintenance and repair of computers and computer equipment\*. Employing CompTIA Server+ certified technicians will help your business stand out from the rest.

### **CompTIA Server+ is supported by top technology companies and organizations.**

CDW Computer Centers, CompuCom, Dell, HP, IBM and Microsoft either endorse, recommend or require CompTIA Server+ as part of their vendor-specific training and certification programs.

### **CompTIA Server+ helps ensure competent server support and maintenance of a critical part of your business operations.**

The growth in the Internet has generated huge amounts of information, which has driven demand for storage\*\*. CompTIA Server+ certified technicians have knowledge of back up and restoration schemes to recover information in a disaster.

### **CompTIA Server+ lowers the costs of training, recruiting and hiring.**

Certified employees have a base knowledge of server hardware, installation, configuration, upgrading and protective maintenance. CompTIA Server+ is vendor-neutral and industry-wide, and validates the ability to work in any company or any environment.
