

Network Implementation and Support

CompTIA Network+® Certification

Networks are an integral part of business operations and keep your employees and customers connected. Proper configuration and maintenance can minimize downtime and help ensure successful network performance.

CompTIA Network+ proves knowledge of networking features and functions, and is the leading vendor-neutral certification for networking professionals. The exam addresses the latest skills needed by technicians, such as basic principles on how to create a secure network.

Earning CompTIA Network+ validates the ability to select, connect, configure and troubleshoot basic network hardware, including wireless technology. Your employees, customers and potential clients depend on your network. Employing qualified technicians will help keep this vital part of your business up-and-running.

Candidates for CompTIA Network+:

- Network Administrator
- Network Technician
- Network Installer
- Help Desk Technician
- IT Cable Installer

CompTIA Certification Programs

CompTIA is the world's largest provider of vendor-neutral certifications. CompTIA certifications are developed with the support of leading technology companies and organizations, and validated by field experts from around the world.

"I always look for CompTIA Network+ on a job applicant's resume because I can be certain that candidate has a broad-base knowledge of networking technologies. It tells me they're motivated to learn, and it shows they have the ambition and drive to prove their knowledge."

– Richard Johns,
Engineer (Consultant),
Spherion

"CompTIA Network+ is a good certification for IT generalists to have, because it gives a broad understanding of networking technologies beyond what CompTIA A+ covers. For a technician who is specializing in networks, CompTIA Network+ is the launching pad certification that will prepare them for earning vendor-specific certifications in the future."

– Brett Knight,
Senior Network Analyst,
Embraer Aircraft

Network Implementation and Support

CompTIA Network+ validates the latest networking knowledge and skills, which helps to decrease network downtime.

IT teams that include certified technicians show more than a 15 percent improvement in capabilities.*

CompTIA Network+ is supported by top technology companies and organizations.

Best Buy, Canon, Cisco, Hewlett-Packard, Microsoft, Ricoh and the U.S. Navy are just some of the organizations that participated in the development of the CompTIA Network+ exam.

CompTIA Network+ certification increases the number of skilled network technicians at an organization.

Trained IT teams succeed more often and are also more likely to meet their project objectives than teams without training.*

CompTIA Network+ minimizes training costs and simplifies the hiring process.

Professionals who are CompTIA Network+ certified have a proven knowledge of networking features and functions, including wiring standards and how to use testing tools.
