

CASP+ For Government Agencies and Contractors

Gain Mastery-Level Security with CASP+ Certification

Power your agency's fight against cyber threats with CompTIA Advanced Security Practitioner® (CASP+) certification.

QUALIFIED EMPLOYEES

CASP+ is the only hands-on, performance certification for practitioners – not managers – at the advanced skill level of cybersecurity. The CASP+ exam confirms an individual's ability in the following competencies:

- Enterprise Security Architecture
- Risk Management
- Enterprise Security Operations
- Technical Integration of Enterprise Security
- Research, Development and Collaboration

CASP+ covers the technical knowledge and skills required to conceptualize, engineer, integrate and implement secure solutions across complex environments to support a resilient enterprise.

DOD 8570/8140 APPROVED

CASP+ is compliant with ISO 17024 standards and approved by the U.S. Dept. of Defense to meet IA technical, management and system architect/engineer certification requirements. CASP+ gets you compliant with DoD 8570/8140 IAT III, IAM II and IASAE I & II job roles.

The U.S. Dept. of Defense asked CompTIA to create CASP+ in order that senior-experienced personnel who must comply with the DoD 8570/8140 requirement have a CompTIA certification option to choose.

CLOUD COVERAGE

Delivering services efficiently and achieving cost savings are the top two drivers of cloud adoption in government. Double-digit growth in government use of public cloud services is expected, with spending forecast to grow on average 17.1% per year through 2021.* Cyber professionals are needed to secure the cloud. CASP+ certification proves readiness for these cloud roles.

DAMAGE CONTROL

Organizations that fully deploy security automation were found to have saved approximately \$1.5 million per incident. A certified workforce is essential to protecting an organization's network.**

“CASP+ tests your ability to implement the knowledge of Security+ and the policies of CISSP, in a vendor-neutral setting.”

WEYLIN PIEGORSCH,
U.S. NAVY VETERAN

DoD Approved IA 8570/8140 Baseline Certifications

CompTIA Advanced Security Practitioner (CASP+) for Government Agencies and Contractors

Employees certified with CASP+ are qualified for these positions and more:

- Cyber Security / IS Professional
- Information Security Analyst
- Security Architect
- IT Specialist INFOSEC
- Cybersecurity Risk Analyst
- Security Engineer
- Application Security Engineer

Advanced Cyber Skills

The CASP+ certification exam includes *hands-on performance-based questions* that require successfully operating in simulated network environments.

WHAT'S INCLUDED IN CASP+ CERTIFICATION (CAS-003)

- Enterprise security domain expanded to include operations and architecture concepts, techniques, and requirements
- More emphasis on analyzing risk through interpreting trend data and anticipating cyber defense needs to meet business goals
- Expanded security control topics to include mobile and small form factor devices, as well as software vulnerability
- Broader coverage of integrating cloud and virtualization technologies into a secure enterprise architecture
- Inclusion of implementing cryptographic techniques, such as Blockchain-Cryptocurrency and mobile device encryption
- 90 questions maximum
- 165 minutes in length
- Pass/Fail only. No scaled score

1. Choose a training option

- Instructor-Led
- Self-Study
- Go to Certification. CompTIA.org/training

2. Get familiar with the exam

- Download the exam objectives
- Review sample questions from the exam
- Go to Certification. CompTIA.org/casp

3. Test

- Locate a Pearson VUE testing center near you and take the CASP+ exam
- Go to home.pearsonvue.com/test-taker.aspx

Jobs for Information Security Analysts are projected to grow 28% for the 10 year period 2016-2026.

BLS

CASP+ Exam Prerequisites:

Ideal candidates should be IT security professionals with a minimum of 10 years of experience in IT administration and at least 5 years of hands-on security in an enterprise environment.
