CompTIA

Server+™ For Government Agencies and Contractors

Virtualize Your Infrastructure with CompTIA Server+

Server+

CompTIA Server+ will empower your IT Staff to efficiently and successfully administer servers that form the cloud.

means more automation

WHAT IS Server+?

Server+ certification is an internationally recognized, vendor-neutral credential that validates the hands-on skills of IT professionals who install, manage, and troubleshoot servers in data centers, including on-premise and hybrid environments. Server+ includes performance-based questions that require the IT pros to demonstrate multi-step knowledge to securely deploy, administer, and troubleshoot servers.

WHO IS Server+ FOR?

Server+ certification is for IT professionals who want to advance toward a rewarding career of building, maintaining, securing, virtualizing and troubleshooting server hardware, storage and software technologies.

VALUED SKILLS

Servers are the foundation of the cloud, and with the increase of digital transformation, organizations continue to depend on skilled professionals to administer servers that form the cloud or in-house solutions. Server+ gives you piece of mind, knowing a critical part of your business is managed and maintained by certified professionals.

HYBRID ENVIRONMENTS

Many organizations are migrating their networks to the cloud. Server+ allows certified individuals to work in a data center or a hybrid environment that integrates cloud solutions, high availability and scripting tools into a server environment.

HIRING TOOL

Requiring or recommending Server+ certification ensures organizations have talent with the latest skills and competencies necessary, to strategically function in both physical and cloud environments by applying the latest server, security, storage, virtualization, and maintenance best practices.

QUALIFIED EMPLOYEES

81% of HR professionals value industry-recognized certifications.* Join the nearly 60,000 IT professionals who have earned Server+.

"

"CompTIA Server+ provides a great pathway to expand one's skills from supporting personal computing devices to supporting shared resources on a network. It represents a whole layer of relevant competencies for job seekers who want to manage and maintain servers or storage in business or data center environments."

Kelly Shotwell,
Director of IT Academy,
Southern Virginia Higher Education Center

Server+ Domains and Percentage of Exam Content

Server Hardware Installation & Management 18%	Server Administration 30%	Security & Disaster Recovery 24%	Troubleshooting 28%
Install, configure, and maintain physical server components.	Install server operating systems and ensure connectivity. Summarize high availability, virtualization, and scripting basics for servers.	Implement proper server hardening, recovery, and security controls.	Successfully diagnose and troubleshoot common server problems.
