

Holmium Laser Enucleation of the Prostate (HoLEP)

Proven effective with strong clinical data for prostates of all sizes^{1,2,3}

Holmium Laser Enucleation of the Prostate (HoLEP) is a safe and effective BPH treatment option for prostates of all sizes. HoLEP involves enucleation of the median lobe, followed by the lateral lobes. The lobes are placed into the bladder for removal by morcellation.

HoLEP results are comparable to TURP and Open Prostatectomy

HoLEP vs. TURP ^{1,2,3,4,5,6}

- Lower perioperative morbidity
- Better bladder outlet obstruction relief
- Equivalent reoperation rates
 - Minimally invasive
 - Equivalent durability

HoLEP vs. Open Prostatectomy ^{1,2,3,4,5,6}

- Similar AUA symptom scores and Qmax
- Shorter catheter duration
- Shorter hospital stay
- No blood transfusions required
- Equivalent durability

HoLEP is durable at 6 years ¹

QOL, Qmax ml/s and IPSS outcomes at 6 years are comparable to outcomes at 1 year

HoLEP has fewer complications and lower re-operation rate ^{1,2,3,7,8,9,10}

HoLEP and HoLAP are backed by strong clinical evidence

HoLAP/HoLEP are the most studied laser BPH treatments with the highest number of published randomized controlled trials

VersaPulse® PowerSuite™

- Highest power holmium laser (100 watts) provides smooth cutting, faster, more efficient tissue effect and reduced time
- State-of-the-art user interface that offers over 200 laser settings accessible through a color touch screen
- CaseSaver™ feature enables the surgeon to continue a case at reduced power in the event of a mechanical or optical malfunction

VersaCut™ Morcellator System

- Adjustable morcellation and aspiration rates provide maximum flexibility
- Compact size fits all operating room environments
- Handpiece ergonomically designed for either right or left hand use

SlimLine EZ™ Single-Use Fibers

- Available in 200, 365 and 550 micron sizes
- Ensure the best performance of fiber for every case

SlimLine™ Reusable Fibers

- Available in 200, 365, 550 and 1000 micron sizes
- Blue jacket enhances visibility during endoscopic surgery

HoLEP	
Description	Part No.
VersaPulse PowerSuite 100W Laser System	0638-803-01
Fibers for use with laser system above:	
SlimLine EZ Single-Use Fiber (550 micron)	0642-395-01
OR	
SlimLine Reusable Fiber (550 micron)	0642-149-55
VersaCut Morcellator System	0637-245-01
VersaCut System includes:	
Control box with foot pedal	0637-202-01
Handpiece	0637-201-02
Blade set	0636-454-01
Sterile tubing (single-use)	2521-0219
Sterilization tray	0636-469-01
Cleaning brush (long)	5404-0060
Cleaning brush (short)	5404-0061
Endoscope adapter	0637-191-01

Preceptor training package available with purchase of VersaCut Morcellator
